ACC fast-tracks Swig's Hanover Sq. buildout

ACC Construction, a preeminent Woman-owned Business Enterprise (WBE) General Contracting and Construction Management firm, has completed an office build out for global software provider Xcitek on the 20th floor of Five Hanover Square, a project commissioned by the building's owner, Swig Equities, LLC, announces Michele Medaglia, president and CEO of ACC.

The project, which was completed within the fast-track six week schedule, entailed a total office interior build out requiring extensive carpentry work, plumbing installation, HVAC, millwork, new flooring and all interior finishes.

"The timeframe for this project was intense," said Medaglia. "Working in concert with architect Richard Rudman, ACC's professionals performed seamlessly and produced a top-quality product that we are proud to add to our portfolio."
